Special Issue Information

The **Dolomites Research Notes on Approximation** invites people working in Approximation Theory (from either the theoretical or numerical point of view), to submit a Special Issue (SI) proposal:
- As conferences proceedings of conferences with topics related to Approximation Theory,
- As conferences proceedings of conferences celebrating scholars who have made significant contributions to Approximation Theory.

The proposal will be examined by the Managing Editors who will reply within a month from the application submission.

Successful proposals will be assigned to one of the Managing Editors who will assist the Guest Editor(s) in the review process. Papers must be submitted through the DRNA website.

Proposal form

To submit a SI proposal, please write to drnadolomites@gmail.com enclosing the the following information as a template for your proposal:

- The proposed Special Issue title and a list of guest editors
- Written proposal of around 1 page. This is an essential item, should be tightly focused and can contain a bullet point list of relevant sub-topics. It must state the rationale for the proposed special issue by giving a brief description of:
    - the special topic or common theme(s) that make these papers a coherent collection
    - a short justification of the timeliness of the topic, including a review of recent significant publications on similar topics, and the relevant state of the art. Please highlight potential advances provided by the papers in relation to existing knowledge and any novelty provided by the papers
- If of benefit, a one-page (draft) call for papers (CFP) may be attached
- A list of potential contributors (if available, include a list of probable paper submissions; titles; authors' abstracts)
- If available, ways of attracting/finding potential contributors. How you intend to a) advertise the SI, and b) attract authors from as wide a base as possible, with consideration to a reasonable balance of geographical spread and author gender.
- Tentative schedule of call, submissions, reviewing, and publication, including:
    - Date CFP published online
    - Date of expected first submission
    - Date first review round completed
    - Date revised manuscripts due
    - Date completion of the review and revision process (final notification)
- The proposed Guest Editor's information including title, Institutional email address, affiliation, fields of interest, and institutional home page. Please include a short biography including qualifications for editing this specific special issue.
    Please note that candidate Guest Editors should be internationally renowned experts in the topics that the SI focuses on.
